DEEPLY GUSSED PAPER FOR CLASS XII

Time allowed: 3 hours

Maximum Marks: 100

A.1 Read the passage carefully and answers the questions that follow:

Science and technology have annihilated distances, brought the various parts of the world much nearer each other, enormously increased international trade and integrated the economy of all nations. It is consciousness of the need for regulating the operations of world economy to make it more orderly and stable that has led to the formation of international bodies to ensure order and stability in matters like tariffs, currency and labour. Foreign aid is being given to developing nations individually because it is now recognized that economic stability and full employment in the world cannot be achieved unless two-thirds of humanity now living at the subsistence level is helped to attain economic maturity as expeditiously as possible. Yet it cannot be said that the material and manpower resources of the world are being utilized on a scientific and planned basis. This country for example, could have raised the standards of living of its people to a much greater extent than at present if it had not been thwarted in its endeavors by shortage of foreign exchange and inadequacy of world statesmanship that, while astronomical amounts are being spent on manufacturing weapons of mass annihilation and space exploration, the affluent nations are not prepared to help developing nations on a scale which would make a significant impact on their lives. Only a world government looking at progress. Many civilizations in the past perished because the people recklessly exploited natural resources, exhausted the soil and turned the land into a desert. Impelled by the profit-motive, nations are still recklessly exploiting world resource without giving any serious thought to what would happen a few hundred years hence. When we know that man has to live on this planet for millions of years, this policy of exploiting, nation's resources and not judiciously conserving them is, to put it mildly, extremely short-sighted. The same short-sightedness is being displayed over population growth. Science has rendered great service to humanity by finding a cure for most diseases, by preventing the outbreak of epidemics which formerly used to kill million of persons and by curtailing the death rate in other ways. But unless men learn to curtail the birth rate as well, we will, before long, be faces with a population explosion. Science has not proved that Malthus was wrong. It has only proved that for some time natural restraints on population in the form of wars, pestilences and famines can be held back.

This planet can be made a decent place to live in only if man is wise. Science given Knowledge and power but not necessarily wisdom.

- (a) Make notes on the above passage using suitable format and recognizable abbreviations (minimum-4). Apply a suitable title also. (5)
- (b) Write a summary using note in about 80 words. (3)

A.2 Read the passage carefully and answers the questions that follow:

1. Most capital cities have fallen victim to the car. Here is a report from Lagos, the capital of Nigeria (Africa)
2. Try not to schedule business appointment in Lagos on a Wednesday-particularly if you have to cross one of the many bridges into the commercial centre, called 'the Island'. It is not that Wednesday is work-free days in Lagos. Just the opposite: mid week is now the day Lagos roads are busiest. (In Lagos they have a five-day week-Monday to Friday.)
3. In 1989, when the city's population was about five million, no fewer than two million people hit Lagos roads at the same time, generally to the same place- the Island . Two million people filled the city's roads in every conceivable kind of vehicle: buses, mini-buses, taxis, mini-taxis and of course, cars, cars and more cars.
4. Car ownership shot up in the oil boom of the mid-1980s. Before anybody realized what was happening, nearly all middle- income workers in business and in the civil service even teachers and clerks, had joined the rich in the car owners' club. Every day more than 150,000 cars contributed to the traffic headache.
5. The State Government decided to take action. It enacted an ingenious traffic control law which divided the cars on Lagos streets into two groups- based on whether they had registration numbers starting with odd or even numbers, On Mondays, Wednesdays and Fridays; only the odd-numbered cars could use the roads. On Tuesdays and Thursdays, cars with registration numbers beginning with 2, 4, 6 or 8 were permitted.

6. The first problem is that there will always be more cars on the roads on the ‘odd-number’ days, because there are odder than even digits- no registration numbers in Nigeria start with zero.
7. But on Monday things are not too bad. The week is still young and business activities are still fairly quiet. Then on Friday, Juma prayers by Muslims mean that the day virtually ends at noon. So Friday is quiet as well. Wednesday is therefore the choice day when as many people as possible- and as many odd- number vehicles as possible- are on the move. Traffic is a nightmare.
8. This law had many interesting effects. Some former car owners, for example, became hitch-hikers. And neighbors with odd-and even- number cars suddenly became friendlier, giving each other rides to work on the alternate days when their cars had no right to the road.
9. But soon the richer Lagosians found another solution. They began to buy second cars, so. They had a car each for odd and even number days could therefore drive into the city when they liked.
10. By 1993, second cars had become so common that the traffic control law become virtually useless. Since then the traffic chaos has gone from bad to worse. Today 300,000 cars compete daily for the 50,000 available parking spaces on the Island. The population of Lagos- a tiny stretch of coastal land 35 kilometers wide and ten kilometers long- has ballooned to eight million.

1. Answer the following given questions:
 - (a) Wednesday is the third day of the week, but in the given passage it been called mid-week. Why? (2)
 - (b) How was the traffic in Lagos affected by the oil boom in the mid-1980s? (2)
 - (c) The State Government of Lagos divided the cars into two groups- odd and even. Why were there more cars in the group? (2)
 - (d) On two working days – Monday and Friday – the traffic conditions were not so bad. Why? (2)
2. Find single words in the passage which mean the opposite of each of the following:
 - (a) Same (Para 3) (4×1= 4)

- (b) depression (Para4)
- (c) order (Para10)
- (d) uncomfortable (Para 10)

SECTION – B (ADVANCE WRITING SKILLS)

B.1 You have lost your wallet containing your valuable documents (ATM card, bunch of keys etc.). While traveling by Rajdhani Express from Agra to Delhi. Write an advertisement to be published in “The Times of India” under the column “Lost and Found” you are Nisha\Nishant of DST 1\A-74, Jeenat Apartments, Dwarka, Delhi. (5)

Or

You have received a formal invitation from Nikhil’s father to attend the dinner party arranged by him. You are unable to attend the dinner. Write a formal regret letter your inability. Sign yourself as Pallavi/Vivek of 82 Arjun Vihar, New Delhi.
