

To show $\triangle ABC \cong \triangle ABD$
 $BC = BD$

Proof In $\triangle ABC$ and $\triangle ABD$
 $AC = AD$ (given)
 $\angle 1 = \angle 2$ (given)
 $AB = AB$ (common)

$\therefore \triangle ABC \cong \triangle ABD$ by
 SAS prop.
 $BC = BD$ (c.p.c.t)

To prove
 $\triangle ABD \cong \triangle BAC$
 $BD = AC$
 $\angle ABD = \angle BAC$

Proof

In $\triangle ABD$ and $\triangle BAC$
 $AD = BC$
 $\angle DAB = \angle CBA$
 $AB = BA$

$\therefore \triangle ABD \cong \triangle BAC$ by
 SAS prop.

$BD = AC$ (c.p.c.t)
 $\angle ABD = \angle BAC$

To show $OA = OB$
 Proof In $\triangle OAD$ and $\triangle OBC$
 $\angle 1 = \angle 2$ (ver. opp
 $\angle s$)
 $\angle A = \angle B = 90^\circ$
 $OD = OC$
 $\therefore \triangle OAD \cong \triangle OBC$ by
 AAS corollary
 $OA = OB$ (c.p.c.t)
