

9. let salary = Rs x
 savings = Rs 400
 Percentage saving = 10

acc. to condition

$$\frac{10}{100} x = 400$$

$$\Rightarrow x = 400 \times \frac{100}{10}$$

$$= 4000$$

$$\therefore \text{Salary} = \text{Rs } 4000$$

10. no. of matches played = 20

percentage of matches won = 25

$$\text{no. of matches won} = \frac{25}{100} \times 20$$

$$= 5$$
