

25 (ii)

correct

outcomes 1, 2, 3, 4, 5, 6

odd outcomes = 3

even outcomes = 3

$$P(\text{odd outcome}) = \frac{3}{6}$$
$$= \frac{1}{2}$$

$$P(\text{even outcome}) = \frac{3}{6}$$
$$= \frac{1}{2}$$

$$\therefore P(\text{odd outcome}) = P(\text{even outcome})$$
